EXPERIENCE

System Specialist

European Dynamics

- 03/2023 Athens, Greece
- Led the development and customization of web applications for the Peruvian government agency OSCE, enhancing system functionality with JavaScript, React, Node.js, HTML5, and CSS3.
- Integrated APIs and optimized internal web applications for performance, improving responsiveness by 30%.
- Collaborated with design teams using Figma to create intuitive user interfaces. Deployed applications via Heroku, ensuring smooth, continuous delivery.

Product Owner

Ransa

- 01/2022 - 01/2024 Lima, Peru
- Improved project success rate by 30% by delivering weekly sprint presentations to senior management.
- Led the integration and development of web-based solutions to enhance export and import logistics services.
- Managed the design and implementation of a user-friendly web interface to streamline internal systems and improve cross-department collaboration.
- Developed a web-based dashboard using Node.js to streamline warehouse operations, improving data accessibility and reporting efficiency.
- Worked closely with the development team to ensure web applications met business requirements and provided high-quality solutions for stakeholders.
- Led the successful completion of 5+ projects, improving operational efficiency and increasing leads in the export-import sector.

Development WMS Specialist

Ransa

- 08/2020 - 01/2022 Lima, Peru
- Spearheaded warehouse management system Infor project, leading the migration of systems for 6 accounts across Ecuador, El Salvador, and Bolivia
- Implemented a new billing project that reduced process time by 25%, improving client response time
- Developed and launched a new reporting module, generating 10 new reports of supply chain management for multiple accounts, enhancing data visibility and decision-making
- Achieved an annual cost saving of 100K USD through system unification and optimization

Process & Continuous Improvement

Ferreycorp

- 12/2018 - 04/2020 Lima, Peru
- Contributed to the successful implementation of SAP S4 HANA, unifying systems across all business areas
- Led process improvements in warehouse, marketing, and finance, resulting in a 20% increase in efficiency
- Achieved ISO 9001 recertification for 2019 and 2020 through strategic process enhancements
- Implemented continuous improvement projects, including the "Machining Ideas" initiative

SUMMARY

Full-Stack Developer and **Industrial and Commercial Engineer** With strong expertise in **Ruby on Rails, JavaScript, SQL, HTML, CSS, React, Angular, Next.js** and **GitHub**, developed through the **Le Wagon Bootcamp**. Focused on building scalable, user-centric applications, with proficiency in deploying web projects using **Heroku** and **Figma**. Backed by over 6 years of experience in **Process Optimization, Automation, and Project Management**, leveraging **Agile** and **Waterfall** Methodologies, including **Scrum** and **Kanban**, to drive innovation, streamline workflows, and deliver operational excellence and cost savings across various industries.

PROJECTS

Impact Trail - Ruby on rails
